

Granol'therm AGF

Fibreglass mesh fabric for facade insulation; certified according to ETAG 004

Field of Application

Reinforcing mesh for External Thermal Insulation Composite System

Composition

Fibreglass fabric made of E-glass with special equipment for high tear and tensile strength and alkali resistance; mesh fabric is resistant to putrefaction

Colours

Individual coloured, with costumer specific printing deliverable

Technical data

Fabric type	Fabric in leno weave
Weight (raw, untreated)	126 ± 5 g/m ²
Weight (impregnated)	160 ± 5 g/m ²
Warp	≥2.000 N/5cm
Weft	≥2.000 N/5cm
Mesh size	approx. 4 x 4 mm
Fabric width	Standard: 1000 mm
Roller length	Standard: 50 m
Storage	Dry and upright; no direct sunlight

Packaging

Standard: 33 rolls = 1.650m² per pallet
